

SEZ Online

New Functionalities/Features

Build Version 3.1

Release: August 2026

Functionalities made available on the SEZ Online system are reviewed and enhanced / modified from time to time. New functionalities are added in the system based on the inputs and requirements received from various user groups to facilitate the working of the users. These functionalities are developed based on understanding developed by NDML team from study of existing practices and procedures in this regard and efforts are made to provide features on the system those are compliant with the procedural and technical requirements. However, users are requested to refer the relevant legal and authorized documents and formations for reference on legal and authentic aspects of the transactions before filing transactions. SEZ Online and NDML does not accept in any respect, any liability for errors, inaccuracy, system mistake, non-compliances due to incorrect / delayed filing of documents, declarations made etc. Also SEZ Online is facilitating system integration and data exchange with various external systems to facilitate user transactions and based on availability of respective systems / data / services / business rules; integration is attempted and SEZ Online or NDML does not accept any explicit or implied responsibility or liability for operation and working of such data exchange systems and related impact, if any on user transactions.

1 Enhancement in attachment of Supporting Documents

1.1 Facility to attach larger supporting documents

Based on User feedback, users can now upload supporting documents up to 10 MB for all administrative modules.

Size has been increased from 2 MB to 10 MB

1.2 Attach supporting documents up to 25 MB for DSPF

As you know, DSPF allows multiple invoices of multiple DTA Suppliers in a single transaction. Based on user suggestions to allow bigger attachments that can cover scanned images of many invoices, the attachment limit has been increased to 25 MB

1.3 Facility to attach compressed documents (.zip,.RAR)

The system will now allow users to attach compressed documents in .zip and .rar formats. It can have an underlying format, viz. .XLS or .XLSX or .PDF or .doc or .docx or .gif or .jpeg or .jpg, etc.

A compressed file can be uploaded for modules. E.g., LOA Renewal/Extension can have an attachment size of 10 MB in compressed format; in DSPF, a compressed file up to 25 MB can be uploaded.

2 Monthly Performance Reporting Form (MPR) Update

The MPR form has been enhanced as shown below, in terms of both aesthetics and the coverage of the information displayed.

Employment, Investment and Trade information are now displayed in collapsible tabs.

User can prepare information by opening the tab, or view already submitted MPR or can edit it for past three months.

Note:
 1) You can view the data of a previously submitted report by clicking the Past Reports link.
 2) You can edit the figures to submit the past three months report.
 3) This will also ensure that your submissions are consistent.
