

SEZ Online

New Functionalities/Features

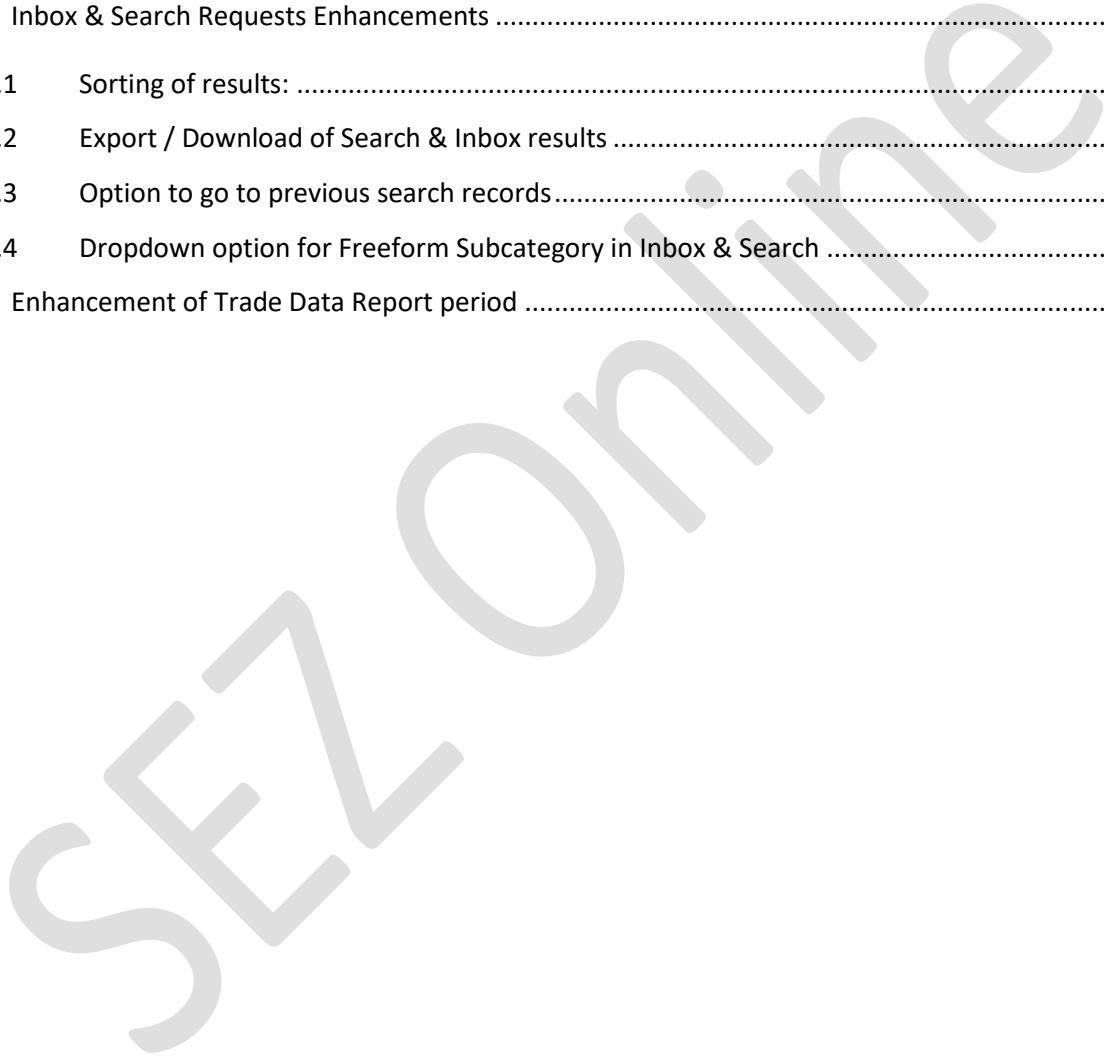

Build Version 2.90

Release: November 2025

Functionalities made available on the SEZ Online system are reviewed and enhanced / modified from time to time. New functionalities are added in the system based on the inputs and requirements received from various user groups to facilitate the working of the users. These functionalities are developed based on understanding developed by NDML team from study of existing practices and procedures in this regard and efforts are made to provide features on the system those are compliant with the procedural and technical requirements. However, users are requested to refer the relevant legal and authorized documents and formations for reference on legal and authentic aspects of the transactions before filing transactions. SEZ Online and NDML does not accept in any respect, any liability for errors, inaccuracy, system mistake, non-compliances due to incorrect / delayed filing of documents, declarations made etc. Also SEZ Online is facilitating system integration and data exchange with various external systems to facilitate user transactions and based on availability of respective systems / data / services / business rules; integration is attempted and SEZ Online or NDML does not accept any explicit or implied responsibility or liability for operation and working of such data exchange systems and related impact, if any on user transactions.

New Functionalities/Features-

- 1 Enhancement of SEZ Online User Interface..... 4
 - 1.1 Login Page:..... 4
- 2 Inbox & Search Requests Enhancements 7
 - 2.1 Sorting of results: 7
 - 2.2 Export / Download of Search & Inbox results 9
 - 2.3 Option to go to previous search records..... 9
 - 2.4 Dropdown option for Freeform Subcategory in Inbox & Search 10
- 3 Enhancement of Trade Data Report period 11

1 Enhancement of SEZ Online User Interface

We are delighted to inform you that SEZ Online experience is being enhanced from User Interface (UI) / design (UX) perspective where you will be able to access / navigate through SEZ Online login and corresponding transaction processing pages swiftly and seamlessly.

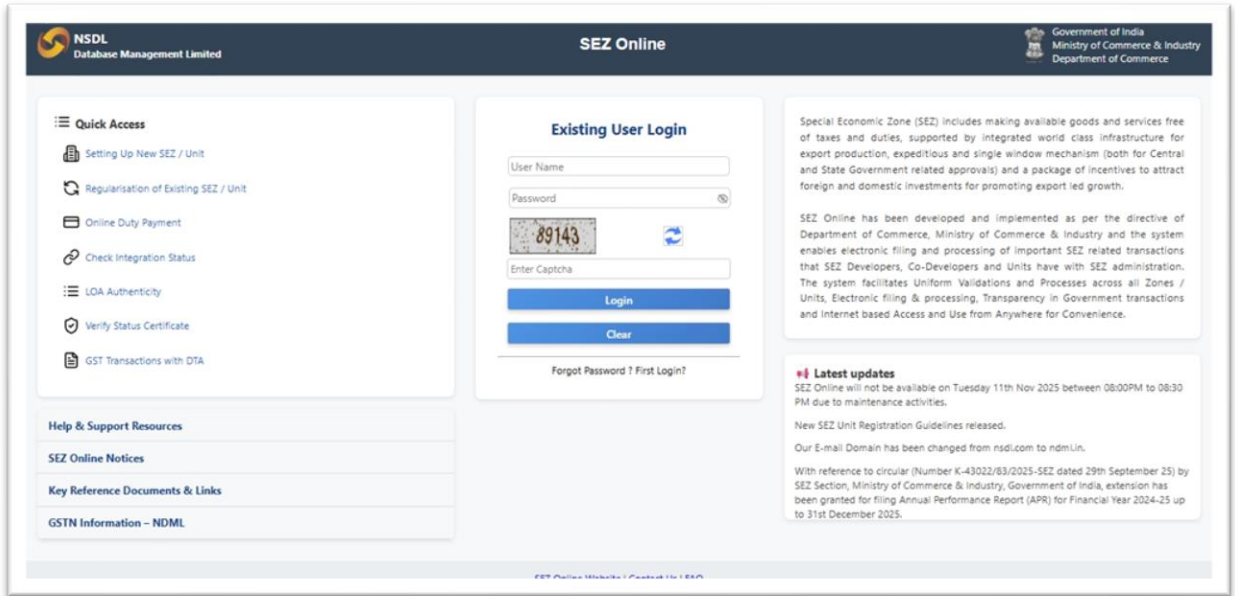

This new interface not only covers smooth navigation but introduces colour standardization, fixing forms cosmetics, navigation/sorting related features, usability aspects and a modern user-friendly experience.

1.1 Login Page:

The login page has been redesigned to provide a more seamless and user-friendly navigation experience. The layout now maintains a central focus area for user login, ensuring clear visibility and ease of access to the system.

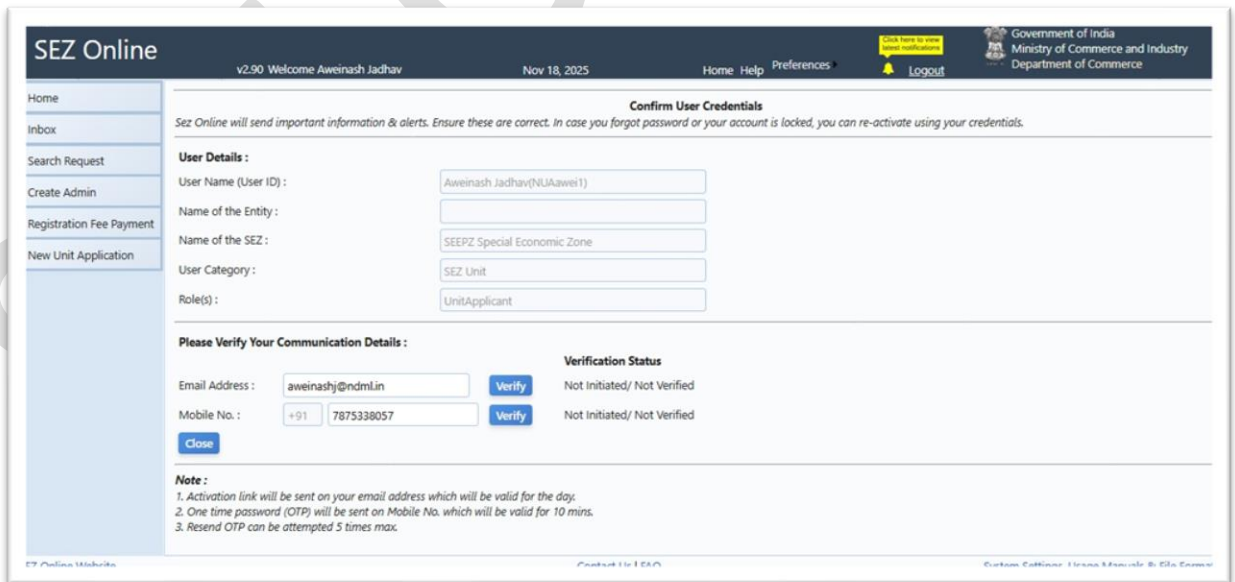

Key resources, including **Quick Access, Help & Support Resources, SEZ Online Notices, Key Reference Documents & Links**, and **GSTIN Information of NDML**, have been repositioned to the left side of the screen. Adequate spacing between these links enhances clarity and makes selection more intuitive for users.

On the right side of the screen, a dedicated section displays information related to **SEZ Online** and **Latest Updates**. This section enables users to stay informed about new form updates, system enhancements, important announcements, and scheduled maintenance downtime. Users are encouraged to regularly monitor this section for the latest developments and notifications.

The theme is carried out throughout the entire SEZ Online system. Core functioning and workflows of all modules remain the same. No form level/field structure level changes are made so you will be able to proceed as it is with new look and feel. Please find below some of the screens with new theme for reference.

Some of the other enhancements which have been made to the SEZ Online system are as below.

2 Inbox & Search Requests Enhancements

2.1 Sorting of results:

Based on the user-selected parameters such as Request ID, Module, Submission Date, and Status, we have introduced sorting capability for Inbox & Search Results for easier navigation and analysis.

The system currently displays the Date of Submission of the request and sorts the Inbox based on Last processing date. To make it convenient for the users we have added the column “**Last Processing Date**”.

Search Request

Request From Date (DD/MM/YYYY): 27/01/2026
 Request To Date (DD/MM/YYYY): 26/02/2026
 Request ID:
 IZ:
 Request Type: BOE
 Request Status: Approved With Duty Forgone
 Noting Number:
 Company:
 Note: The 'From Date' and 'To Date' is not a mandatory criteria if Request Id is mentioned. However while searching with 'Request type' & 'Request Status', it is a mandatory criteria.

2.2 Export / Download of Search & Inbox results

Further enhancement to this screen is that users will now be able to download the entire Search & Inbox results to excel by just clicking on the link “**Export to Excel**”.

This would greatly boost users for tracking and closure for pending requests.

NOTE: THE FROM DATE AND TO DATE IS NOT A MANDATORY CRITERIA IF REQUEST IS FILTERED. HOWEVER WHILE DEALING WITH REQUEST TYPE & REQUEST STATUS, IT IS A MANDATORY CRITERIA.

2.3 Option to go to previous search records

We have implemented an enhancement in the search functionality to address the inconvenience users faced when returning to previously fetched records.

With this update, if a user navigates away from the search page and later returns to it, the system will retain and display the previously selected search parameters, allowing the user to view the same results without re-entering the criteria. It will be maintained in single session only. If you log out and login again, input parameters in search reset will get reset to default.

Users can now navigate between selected periods by clicking on the “**Previous Records**” and “**Next Records**” links. While shifting back and forth, all other selected search parameters will remain unchanged, ensuring continuity and eliminating the need to reapply the criteria.

Example:

If a user searches records for the period **From 01/01/2026** and **To 31/01/2026** with specific filters such as *Module: BOE/SB etc.* and *Status: Approved with Duty Forgone*, they can click on **“Next Records”** to view **From 01/02/2026** and **To 28/02/2026** data with the same filters applied automatically. Similarly, by clicking **“Previous Records”**, they can return to **From 01/12/2025** and **To 31/12/2025** without reselecting the module or status criteria.

2.4 Dropdown option for Freeform Subcategory in Inbox & Search

To facilitate users, we have introduced an additional dropdown option for the user to select the **Freeform Subcategory available under Free Form (Admin/Customs) categories**. This option is enabled only when the user has selected the **Request Type** as **Freeform**. E.g. When User selects Free Form, all sub-categories will be shown in Sub-category field

The screenshot displays the 'Inbox' search interface. At the top, there are date pickers for 'Request From Date (DD/MM/YYYY)' (11/02/2026) and 'Request To Date (DD/MM/YYYY)' (18/02/2026), along with a 'Request Id' field. A note states: 'Note: The 'From Date' and 'To Date' is not a mandatory criteria if Request Id is mentioned. However while searching with 'Request Type', it is a mandatory criteria.' Below this are 'Search' and 'Reset' buttons. A 'Current available balance in SEZ Online Account is Rs. 24' is shown. A table lists 'Pending Requests : 2' with columns for Request Id, Request Type, Request Status, and Request Date. Two requests are listed: one with Request Id 172600219035 (BOE-Abroad) and another with Request Id 672600501184 (DTA Services Procurement Form). A 'Free Form' dropdown menu is open, showing a list of subcategories under 'Free Form - Subcategory'. The subcategories include: 'Customs - Cancel Customs Transaction', 'Customs - Amend Customs Transaction', 'Customs - Developer / Unit - Job-work (Sub-Contracting) Permission', 'Customs - Others', 'Admin - Unit - Permission for Movement of Data backup tape', 'Admin - Others', 'Admin - Unit - Intimation of DCP', 'Admin - Issuance of Form-I for CST Exemption', 'Admin - Broadbanding/Capacity Enhancement', 'Admin - Unit - Intimation for Jewellery Exhibition', 'Admin - Changes in Area (Addition)', 'Admin - Unit - Permission for Jewellery Exhibition', 'Admin - Application for GSP Certification', 'Admin - Capacity Enhancement Request', 'Admin - Change of Entrepreneur or in Shareholding Pattern', 'Admin - Change in the Items of Manufacture or Service activity', 'Admin - Final Exit from SEZ Scheme', 'Admin - Default Services for Authorised Operations', and 'Admin - Changes in Area (Deletion)'. The 'Request Type' dropdown is set to 'Free Form'.

3 Enhancement of Trade Data Report period

Previously users were allowed to only fetch Trade Data Report for a period of 3 months and requiring them to generate this report multiple times. The maximum period has been extended from **3 months to 1 year (12 months)**, allowing users to retrieve a broader range of data within a single request.
